Floral Parade.

The work for the Floral Parade committee is advancing rapidly and most satisfactorily. It is to be expected that the citizens of Honolulu, who have made this their abiding place for years, would spare no pains to make the yearly Floral Parade one of great attraction—each year the parade to surpass the one previous. Now, the Chinese and Japanese element are entering into the spirit with great enthusiasm and ready to make an artistic display which will give them an opportunity of showing the work they enjoy and are capable of doing. A large number of floats will be in line, and the decoration of some distinctive feature will make the parade of nineteenth hundred and ten a triumph of art. Suggestions in relation to designs for floats and automobiles, of which over one hundred are expected to be in line—will be given by the committee if so desired. Society folk are greatly interested in the automobile section, and can not fail to make this a great attraction, and the committee is ready to give pointers for designs for the cars, as well as to get the addresses of makers of paper flowers, for decorative purposes, as it will be out of the question for Honolulu to supply the demand for the natural product. As the Japanese are noted for their clever handwork in producing good imitation of flowers, it will be helpful to those who desire to make their car as attractive as good taste can make it. With suitable decorations and a selection of fair women, in their lovely toilets of some light delicate material, modish hats, and the general style of the Honolulu society women—this in itself would fill the onlooker with admiration and joy that they are living to see all this beauty. The task of appointing ladies to serve on committees falls upon Mr. Walter Dillingham, chairman of the committee on automobiles. In the evening something is promised that will be unique, and a suitable ending to this gala day. The artistic features are being attended to by Mr. James A. Wilder, which is promising. Mr. William A. Love will exercise a general supervision, and it is their aim to make it the greatest spectacular performance ever witnessed in Hawaii.

A beautiful new edifice is to be erected on the corner of Beretania and Victoria streets by the Methodist congregation of this city. The ceremony of turning the first spadeful of earth on this ground, now consecrated to the building of a house of worship, took place on Monday afternoon, January the tenth, with most impressive services. Governor Frear officiated in the capacity of turning the sod on the site where the church will stand. A large assemblage was present. The Hawaiian band discoursed its best music. A large American flag floated gracefully from a staff, and a company of boys in uniform from the Korean school formed an effective group. The clergy was well represented, and addresses were made by those present.

After living in that vigorous climate for the past two years it is not at all surprising that they long for the balmy air and gentle breezes. A rumor which was most pleasing to Honolulu folks was that Admiral and Mrs. Lyon were coming to this place, and would make it their permanent home upon his retirement from active service. The Lyons were here a number of times, and were universal favorites.
